

paani RAMADAN — REPORT

The Prophet ﷺ said, "Whoever feeds a person breaking his fast will earn the same reward as him, without anything being lessened from the reward of the fasting person." (Tirmidhi)

THE SITUATION

Currently, over 21 million Pakistanis suffer from a water sanitation crisis that has impacted the entire country. This situation has been exacerbated by the ongoing coronavirus pandemic. 31% of families in rural Pakistan are already living below the national poverty line, with many relying on their daily wages to provide food for their families. Major cities like Karachi and Lahore struggle to provide access to clean and safe drinking water, but the situation worsens amongst rural villages that not only lack modern systems, but also adequate healthcare. Contaminated water is the leading cause of diarrhea and other severe health conditions, resulting in death due to a lack of treatment in many of these underdeveloped villages. Children, more than any other demographic, are the most vulnerable victims of these health conditions as their immune systems are not developed enough to withstand the bacterially-infected water they're forced to drink.

EXECUTION PLAN

Ramadan is the month of benevolence and serves as the best time of year to give charity.

Every Ramadan, Paani leads an effort to alleviate common issues in rural and underdeveloped areas of Pakistan.

This primarily consists of:

1. Building clean water wells and providing water containers to urban communities
2. Providing food packages to families in need that last the entirety of Ramadan

IMPACT IN NUMBERS

\$2M+ donated
6,000+ wells built
2.5M meals delivered
600,000+ villagers impacted
